

CARDINAL MANUFACTURING

School District of Eleva-Strum
Presents

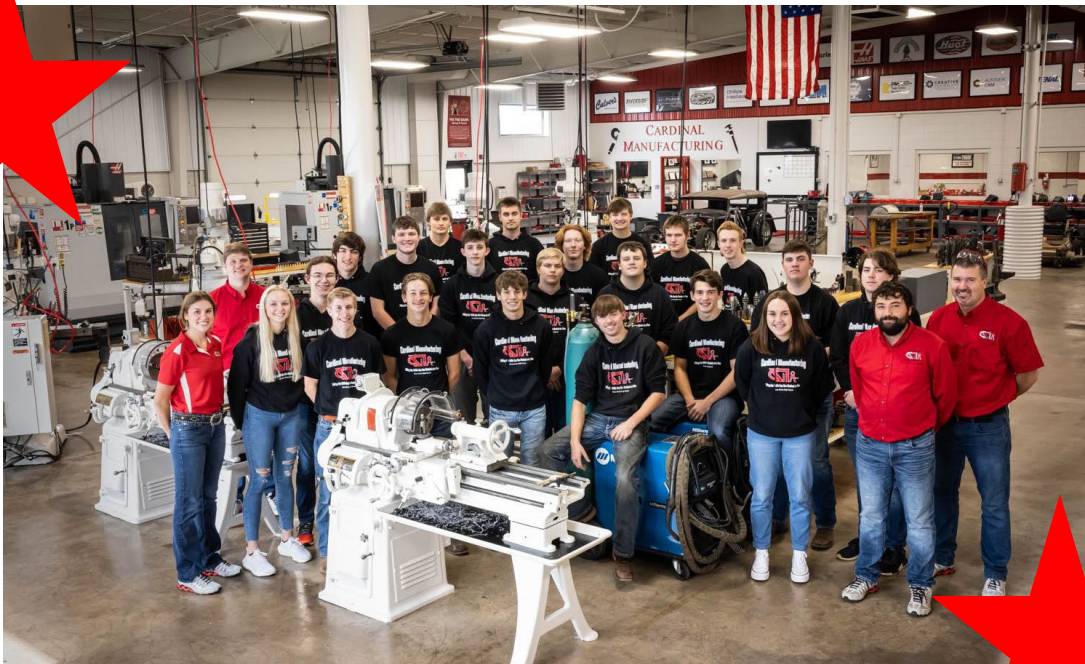

Starting or Growing Your Student Run Business Workshop

Would you like to learn how to create a student run business in your school district? Come join Cardinal Manufacturing instructors, students, industry partners, and school administration as they host a Cardinal Manufacturing, Starting or Growing Your Student Run Business Workshop. Many teachers, administrators, and industry partners contact Cardinal Manufacturing each year to learn how to create a program like Cardinal Manufacturing in their own districts. Please visit the Workshop Registration page on <https://www.cardinalmfg.org> or contact us to register!

Cardinal Manufacturing has had great success since its beginning years in 2008-2009 as students not only learn valuable technical skills, but also the soft skills and employability skills that employers demand. Our model provides students a successful pathway by following the Nexen Ten Commandments for Career Success, all while gaining a real life-manufacturing experience. Ultimately achieving our goal of "Filling the Skills Gap One Student at a Time."

Contact us today to attend a Cardinal Manufacturing Workshop!

Cardinal Manufacturing
W23597 US Highway 10, Strum, WI 54770
